Validation Rules:

- Fields Login, Password, E-mail and Date of Birth are required. If user doesn't fill in any of these fields, after he presses Register button, empty required fields are highlighted with red and the user gets the message: "Please, fill in the required field".
- If user enters Login, which is less than 2 characters, after he presses Register button, he gets the message: "Login is too short, dude!"
- If user enters Password, which is less than 7 characters, after he presses Register button, he gets the message: "Password is too short, dude!"
- If the user's Password doesn't correspond to the format, after the user presses Register button, he gets the message: "Password is too simple. Don't help criminals!"
- If user enters e-mail, which doesn't correspond to the requirements, he gets the message: "Something wrong with your e-mail, dude!"
- If user enters Date of Birth that doesn't correspond to the format, he gets the message: "Something wrong with your date of birth, dude!"
- If user enters Date of Birth and it appears that the user is younger than 18, after he presses Register button, he gets the message: "Seems like you're too young, fella!"
- System doesn't allow the user to enter more than max number of characters into any field on the form.
- If the user uploads file of any extension except .jpg, he gets the message: "Oops, only .jpg is allowed!"
- If the user uploads an image that is bigger than max size or max dimension, he gets the message: "Awesome pic, but too big!"
